Convince Computer Ltd.

About CCL

Convince Computer Limited (CCL) was established in April 2000 as a limited company. It is a multifaceted IT solutions company, enabling businesses to leverage leading edge technology to gain sustainable competitive commercial advantage in today's complex marketplace. CCL provides high quality software and web services across a broad range of industries and have gained years of unbeatable experience with companies, helping to convert business needs to useable solutions. We bring a powerful combination of technological expertise and domain knowledge. At CCL, quality software is not just bug-free and cost-effective, but a solution that serves the customers' needs accurately.
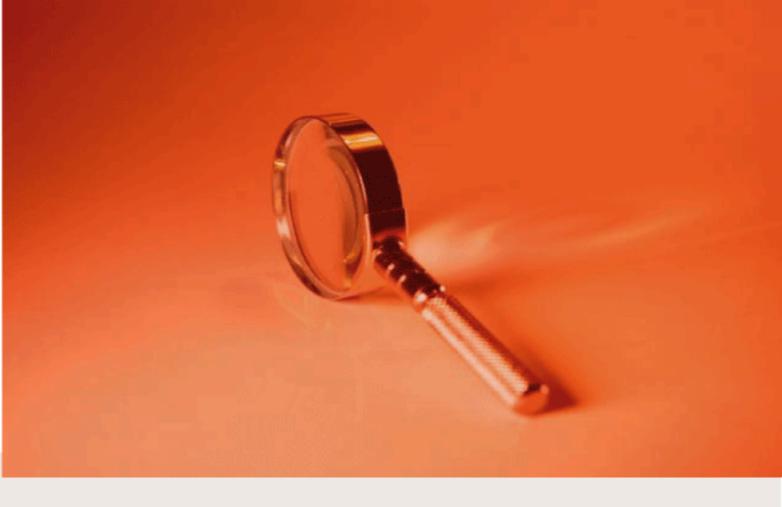

Vision

To be the leader in providing time tested, state-of-the-art, emerging technology solutions & services to help customers address their business needs and be competitive through new and innovative solutions.

Mission

To become a leader in providing strategic IT solutions by improving the customers':

- Reliability/Productivity/Performance
- ROI- Return on Investment.

Quality Assurance

CCL has a team of QA professionals with over 22,000 hours of external QA experience. To guarantee the effectiveness and thoroughness of the testing, our QA team uses the most up-to-date technologies. We have well educated specialists who perform a system analysis beyond basic testing which allows for discovery of the system's weak points. In the most difficult cases, our top developers who solve tasks of utmost complexity according to client's needs perform the testing.

Services

- ERP Solutions
- Software Solutions
